Subject: Delta Action 8 late-fall CWT fish experiment

Based on the decision to reduce exports as of tomorrow morning (Dec. 10) (see message coming from John Burke) the Delta Action 8 late-fall CWT fish experiment will commence also on Dec. 10 with the release in Georgiana Slough. The Sacramento River release will occur late on Saturday, Dec. 11. Normally it occurs at Ryde, but it will be moved a few miles downstream to Isleton, because of the tide.
